DETAILED ACTION

1. This Office Action is in response to Applicant's Amendment filed May 13, 2011. Claims 22-34 are pending in this case. Claims 22, 25, and 27 are currently amended.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on May 13, 2011 has been entered.

Reasons for Allowance

3. Claims 22-34 are allowed.
4. The following is the Examiner's statement of reasons for allowance:
5. Regarding the claimed terms, Applicant is reminded that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-59 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings . . . the inventor's lexicography must prevail" *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.

6. The cited references, Sampson (6,429,524), Blakley (5,832,211), and Mehring (6,609,115) disclose as previously discussed.
7. The references, alone, or in combination, however, do not teach at least, intercepting a request from a user to access information protected by the target user authenticator, promoting by the servlet interceptor the identification from the user, monitoring by password capture process the source user authenticator for an approval response, detecting by the password capture process the approval response from the course user authenticator, and capturing by the password capture process, the user authentication data provided to the source user authenticator by the user. Neither are the said features likely to be found in a reasonable number of references.
8. For these reasons, independent claim 22 and its dependent claims 23-34 are deemed allowable.
9. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CRISTINA SHERR whose telephone number is (571)272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.
11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Calvin L. Hewitt, II can be reached on (571)272-6709. The fax phone

number for the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
